Hi John- I've taken a look at appendix B and do not have any comments to provide as this is not really an air monitoring plan (so no risk/exposure issues to comment on). I would maybe recommend that an engineer look at the proposal. Sorry I couldn't be of more help.

Republic sent their reintroduction plan for leachate to the sewers at Monroe Twp. Landfill. Page 6 of appendix B contains the Air Monitoring plan, could you take a look at it for me?

Good evening,

Please find attached a revised memorandum discussing the plan for reintroduction of leachate into the sanitary sewer. Please review and return any questions or commentary at your earliest convenience. We were uncertain of distribution for the team with Jacobs Engineering so they have not been included in this distribution, please share with any members of Jacobs, NJDEP, EPA, or MTUD who were omitted.

Attachment B includes information regarding equipment, installation, and intended use of monitoring devices to be utilized for observation, analysis, and implementation with the sewer reintroduction. As was discussed in our previous meetings, we would like to request this email serve as a 48-hour request and we would like to coordinate installation of monitoring equipment to occur next week, or as soon as is permissible.

Thank you again for your cooperation and efforts,

Jacob Schmidt
